

## Algebra: Fact Family

A fact family is a set of related facts.

For the numbers 2, 7, and 11, this is the fact family:

$$2 + 7 = 11$$

$$7 + 2 = 11$$

$$11 - 2 = 9$$

$$11 - 7 = 4$$

### Examples:

Complete the fact families.

1) 6, 4, 10

$$\underline{6} + \underline{4} = \underline{10} \quad \underline{10} - \underline{6} = \underline{4}$$

$$\underline{4} + \underline{6} = \underline{10} \quad \underline{10} - \underline{4} = \underline{6}$$

2) 9, 5, 14

$$\underline{9} + \underline{5} = \underline{14} \quad \underline{14} - \underline{9} = \underline{5}$$

$$\underline{5} + \underline{9} = \underline{14} \quad \underline{14} - \underline{5} = \underline{9}$$
