## Frequency Distribution of Ungrouped Data

- 1) Find the cumulative frequency and the percentage of each age group for the data given below:

Age group $x$	Population ('000)
5	676
15	885
25	1000
35	1267
45	1208
55	677
65	503
75	499

- 2) Given the table below, find the frequency and the relative cumulative frequency

Classes	Cumulative frequency
4.5	0
9.5	3
14.5	12
19.5	48
24.5	83
29.5	95
34.5	98
39.5	100
