

Add on Multiples of 100

How to add three-digit numbers (for example $600 + 500$).

Place one number above the other so the hundreds' place digits, the tens' place digits and ones' place digits are lined up. Draw a line under the bottom number.

$$\begin{array}{r} 600 \\ \underline{500} \end{array}$$

Add the two ones' place digits. ($0 + 0 = 0$).

$$\begin{array}{r} 600 \\ \underline{500} \\ 0 \end{array}$$

Add the numbers in the tens' place column ($0 + 0 = 0$) and place the answer below the line and to the left of the ones' place sum.

$$\begin{array}{r} 600 \\ \underline{500} \\ 00 \end{array}$$

Add the numbers in the hundreds' place column ($6 + 5 = 11$) and place the answer below the line and to the left of the tens' place sum.

$$\begin{array}{r} 600 \\ \underline{500} \\ 1100 \end{array}$$

Examples:

A- Count on hundred to add.

1) $145 + 300$

$145 + 300 = \underline{445}$

2) $684 + 200$

$684 + 200 = \underline{884}$

3) $321 + 100$

$321 + 100 = \underline{421}$

4) $297 + 500$

$297 + 500 = \underline{797}$
