

Algebra: Missing Addends

What is the missing addend? $6 + ? = 13$

You can either use addition or subtraction to find the missing addend.

Use addition

Start with 6, how many do you add to have 13?

$$6 + \underline{\quad 7 \quad} = 13$$

So the missing addend is 7

Use subtraction

Use a related subtraction fact

Start with 13, Take away 6. How many are left?

$$13 - 6 = \underline{\quad 7 \quad}$$

So the missing addend is 7

Examples:

Use addition and a related fact to find the missing addend.

$$1) \ 6 + ? = 14$$

$$2) \ 9 + ? = 16$$

$$6 + \underline{\quad 8 \quad} = 14$$

$$9 + \underline{\quad 7 \quad} = 16$$

$$14 - 6 = \underline{\quad 8 \quad}$$

$$16 - 9 = \underline{\quad 7 \quad}$$

The missing addend is 8

The missing addend is 7

Algebra: Missing Addends

My Real Life

A) Rana has 8 pens. She buys 3 more pens. How many pens does she have now?

$$8 \quad + \quad 3 \quad = \quad 11 \quad \text{pens}$$

B) Faysal has 18 balloons. He gives 8 balloons to his friend. How many balloons does Faysal have now?

$$18 \quad - \quad 8 \quad = \quad 10 \quad \text{balloons}$$
