

Divide by 9 and 10

You can use counters to divide by 9 and 10.

Find the quotient for $63 \div 9$.

Place 63 counters into 9 equal groups.

There are 7 counters in each group.

So, $63 \div 9 = 7$.

Find the quotient for $30 \div 10$.

Place 30 counters into 10 equal groups.

There are 3 counters in each group.

So, $30 \div 10 = 3$.

Examples:

A- Find the quotient

1) $18 \div 9 = \underline{2}$

2) $\underline{6} = 30 \div 5$

3) $50 \div 10 = \underline{5}$

4) $\underline{9} = 81 \div 9$

5) $\underline{2} = 20 \div 10$

6) $9 \div 9 = \underline{1}$

My Real Life

A) Kinda's class has 40 students. The art exhibits can only fit 1 group of 10 students at a time. How many groups of students will there be from Kinda's class?

$$\underline{40 \div 10 = 4 \text{ groups}}$$

B) Sonia plans to feed 9 dolphins, each with the same number of fish. She has a bucket with 27 fish. How many fish will each dolphin receive?

$$\underline{27 \div 9 = 3 \text{ fish}}$$
