

Fractions Equal to 1

The whole is divided into equal parts
What fraction names this whole?

Let us consider a whole that is divided into five equal parts
Count all the fifths to make a whole.

One fifth
 $\frac{1}{5}$

Two fifth
 $\frac{2}{5}$

Three fifth
 $\frac{3}{5}$

Four fifth
 $\frac{4}{5}$

Five fifth
 $\frac{5}{5}$

So, $\frac{5}{5}$ names the whole

$$\frac{5}{5} = 1$$

Examples:

A) Count the equal parts. Write a fraction for the whole.

1)

$$\frac{2}{2} = 1 \text{ whole}$$

2)

$$\frac{8}{8} = 1 \text{ whole}$$

3)

$$\frac{4}{4} = 1 \text{ whole}$$
