

Length

You can use centimeters, decimeters, meters, and kilometers to measure length and distance.

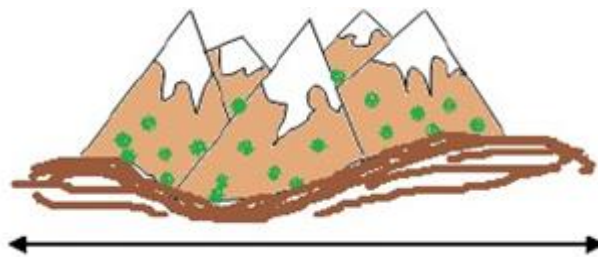

Use centimeters (cm) and decimeters (dm) to measure the length of smaller objects.

Use meters (m) to measure the length of long objects and short distances.

Use kilometers (km) to measure the length of long distances.

Choose the unit you would use to measure the object below. Write cm, dm, m, or km.

A mountain range is a long distance so use km.
