

Model 2-Digit Numbers Subtraction

Subtracting tens such as $(80 - 20 = 60)$ is like subtracting quantities of items.

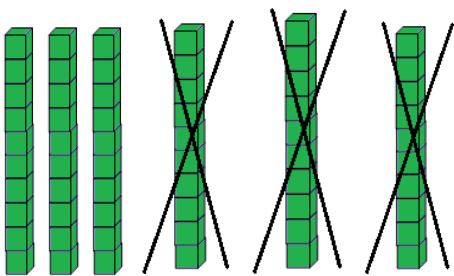

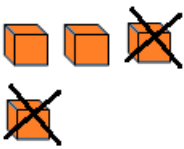

In this case 2 tens are subtracted from 8 tens to leave 6 tens.

This is similar to 2 oranges being subtracted from 8 oranges to leave 6 oranges.

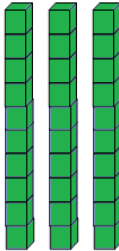

Subtract $64 - 32$

	Tens	Ones
64		
32		

You cancel 3 ten blocks and 2 ones blocks

	Tens	Ones
64-32		

So, the difference is:

	Tens	Ones
32		

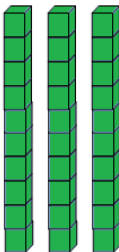

3 tens 2 ones
32

Subtract $47 - 9$

	Tens	Ones
47		
9		

You need to cancel 9 ones from 7 ones which is not possible. So we need to regroup 1 ten blocks

	Tens	Ones
$47 - 9$		   

So, the difference is:

	Tens	Ones
38		

3 tens 8 ones
38

My Real Life

A) There are 17 children swimming. Then 5 children went home. How many are left?

$$17 - 5 = 12 \text{ children}$$

1 tens 2 ones

B) There are 18 students in class 3 students left to the playground. How many students are left?

$$18 - 3 = 15 \text{ students}$$

1 tens 5 ones

C) There are 24 children. 11 children dance. The other children sing. How many children sing?

$$24 - 11 = 13 \text{ children}$$

D) Hanan sold 25 tickets for the play. Amna sold 12 tickets. How many more tickets did Hanan?

$$25 - 12 = 13 \text{ tickets}$$

E) Mrs. Rima makes 23 wooden frames. He gives away 8 frames as gifts. How many frames does he have left?

$$23 - 8 = 15 \text{ frames.}$$

F) Dany has 21 origami figures. He gives 5 to his sister. How many origami figures are left?

$$21 - 5 = 16 \text{ origami figures.}$$
