

Multiply with 1 and 0

Find the product.

$$4 \times 0 = \underline{\quad}$$

Draw a pair of pants with four pockets, each pocket containing 0 marbles.

$$4 \text{ pockets} \times 0 \text{ marbles} = 0 \text{ marbles}$$

$$\text{So, } 4 \times 0 = 0.$$

Zero Property of Multiplication
The product of zero and any number is zero.

Multiply the product. $1 \times 6 = \underline{\quad}$

Draw a pair of pants with one pocket containing 6 marbles.

$$1 \text{ pocket} \times 6 \text{ marbles} = 6 \text{ marbles}$$

$$\text{So, } 1 \times 6 = 6.$$

Identity Property of Multiplication
The product of any number and 1 is that number.

Examples:

A) Find the product

1) $5 \times 1 = \underline{5}$

2) $8 \times 0 = \underline{0}$

3) $1 \times 0 = \underline{0}$

4) $0 \times 7 = \underline{0}$

5) $1 \times 9 = \underline{9}$

6) $1 \times 1 = \underline{1}$

7) $0 \times 5 = \underline{0}$

8) $1 \times 7 = \underline{7}$

My Real Life

A) Eman saw 7 nests. There were 0 eggs in each nest. How many eggs were in the nests Eman saw?

$$7 \times 0 = 0 \text{ eggs}$$

B) Tamara saw 4 chickens' coops. In each coop she saw 1 chicken. How many chickens did Tamara see in all?

$$4 \times 1 = 4 \text{ chickens}$$
