

## Multiply with 3

You can use a number line to multiply with 3.

Find the product: \_\_\_\_\_ =  $7 \times 3$ .

The factor 7 tells you to make 7 jumps.

The factor 3 tells you that each jump should be 3 spaces.

So,  $7 \times 3$  means 7 jumps of 3 spaces each.

Start at 0.

Stop at 21.

So,  $21 = 7 \times 3$ .

### Examples:

#### A- Complete

1)  $2 \times 3 = \underline{\quad\quad\quad} \times 2$

$2 \times 3 = \underline{3} \times 2$

2)  $5 \times 2 = \underline{\quad\quad\quad} + 1$

$5 \times 2 = \underline{9} + 1$

3)  $8 \times 1 = \underline{\quad\quad\quad} + 1$

$8 \times 1 = \underline{7} + 1$

4)  $8 \times 1 = \underline{\quad\quad\quad} \times 8$

$8 \times 1 = \underline{1} \times 8$

5)  $2 \times 3 = \underline{\quad\quad\quad} + 1$

$2 \times 3 = \underline{5} + 1$

6)  $5 \times 2 = \underline{\quad\quad\quad} \times 5$

$5 \times 2 = \underline{2} \times 5$

**My Real Life**

A) Jana places 3 seeds into each pot. If there are 9 pots, how many seeds does Jana place?

$$9 \times 3 = 27 \text{ seeds}$$

B) A sandwich shop puts 3 pickles on each sandwich. How many pickles are used in order for 5 sandwiches?

$$5 \times 3 = 15 \text{ pickles}$$
