

Circles

<p>A circle is named by its center point.</p> <p>All the points on the circle are the same distance from the center point.</p>	
<p>A chord is a line segment that has its endpoints on the circle.</p>	
<p>A radius of a circle is a line segment from the center to any point on the circle.</p>	
<p>A diameter of a circle is a chord that passes through the center.</p>	

Draw a circle.

- 1) Label the center point R.
- 2) Draw a radius RS.
- 3) Draw a diameter TV.
- 4) Measure the radius.
- 5) Measure the diameter.
