## Parallel Lines and Special Angles

- A) 1) Find
- $x$
- so that
- $c \parallel d$
- .

- B) Find the measure of each numbered angle.

2)  $m\angle 4$

3)  $m\angle 3$

4)  $m\angle 5$

C) Given the diagram below, find:

5) Find the value of  $x$

6) Find the value of  $y$

D) Given the diagram below, find:

7)  $m\angle 1$

8)  $m\angle 2$

9)  $m\angle 3$

10)  $m\angle 4$

11)  $m\angle 5$
